INDEX OF SUBJECTS

Volume 39

Ageostrophic method 269
Agricultural meteorology 315
Aircraft measurements 41, 53, 219, 283, 333
Air pollution 53, 93, 175, 207
Antarctic meteorology 1
Askervein Hill project 15, 107, 247

Capping inversions 333
CAPTEX 53
Cold air advection 41, 283
Convective entrainment 283

Eddy diffusivity 191
Effective roughness length 403, 419
Energy balances 233

Geostrophic drag coefficient 219
Ground heat storage 233
Gusts 153

Heat and water vapour budgets 283
Heavy particle dispersion 175

Inertial oscillations 1, 333
Internal gravity waves 1

K-theory 207

Laboratory studies 133, 301
Low-level jets 1, 333

Marine atmosphere 219
MASEX 41
Mesometeorology 15, 41, 67, 87, 107, 233, 247, 283, 379
Microburst observations 67

Numerical modelling 1, 53, 107, 207, 247, 283, 379, 403, 419

Optical experiments 133

Planetary boundary layer 1, 41, 53, 67, 107, 247, 269, 283, 333, 403
Pressure drag 379

Quadratic exchange coefficient 207

Random-walk models of dispersion 175
Remote sensing 1, 41, 67, 133
Rossby similarity functions 219
Roughness length 403, 419

Skewness 315
Specular facet 133
Stable boundary layers 1, 191, 207
Stress profiles 269
Subcloud-layer meteorology 67
Surface boundary layer 15, 87, 107, 191, 301
Surface heat flux 87

Thunderstorms 67

Urban meteorology 153, 233

Vortex structures around a hump 301

Wind energy 153
Wind-wave structures 133
